Sternberg has created a unique lighting fixture styled after the Arts and Crafts movement of the early 1900's. Rooted in the pre-modern period prior to 1930, Arts and Crafts style stood for traditional craftsmanship and the use of simple forms. It is undeniable that Frank Lloyd Wright was influenced by this style and that the Prairie family was patterned from his low sloping roof line designs. The simple yet attractive luminaire family Sternberg calls the Prairie family is versatile and beautiful.

Styles

Prairie family members take many shapes and have several scale options. Mounting options are numerous from post top to side arm to wall and pier mountings and from pendant to chain hung fixtures. This versatile product family is at home in park environments and on streetscapes. It can be paired up with a simple square straight aluminum pole or a rustic wooden pole structure with braced cross-arm design (shown left).

QUICK FACTS

- Prairie fixtures can be fitted with several clear or art glass options.
- Decorative chimneys can be lit or unlit.
- Decorative window grilles can be optioned and custom designs are also available.
- Light sources from LED to HID are available. Wattages vary based on physical size.
- Family members include Bollards and stem/chain hung models.

Technical

Light Source

LED

LED light sources and roof mounted, down-lighting optics are available.

HID

HID sources including high pressure sodium and metal halide are available.

Optics

Roof Optics (RO)

NIGHTSKY® STAR-SHIELD® Roof Optics are roof mounted reflector systems which eliminate up light and provide cut-off distribution. Different distribution types are available. See specific product Spec Sheets for information

Refractors (RE)

6" diameter borosilicate glass with an I.E.S. Type 3 or 5 distribution. Secured to the socket stem with 3/8" plated steel threaded pipe nipple, it rests on a cast aluminum holder with anti-shock gasket. The refractor is secured to cast holder with a quarter-turn internal aluminum twist ring for ease of maintenance.

NIGHTSKY® OPTI-SHIELD® Louver Optic System (LO)

A multi-tier reflector with 7" diameter rings to produce an I.E.S. Cut - off Type 3 or 5 distribution. Made of highly specular anodized aluminum and comes standard with medium base socket.

* See specific product Spec Sheets for information

Grille Art

The Prairie family of products is perfect for customization and personalization. Each project needs its signature and the theme of any project can be reflected in the beautiful window grilles of the Prairie family of lighting fixtures. Grilles and door frames can be cast or water jet cut to customer or designer specification. When paired with art glass each piece of grille art comes alive with the image and style the designer has envisioned.

Details as intricate as the grape cluster, (shown left), can be enhanced by adding a custom paint application.

Custom grilles can be strictly art or simply a visual cue to the environment. Experts at Sternberg can consult on design ideas. Give our team a call with your ideas and we will transform your ideas into reality.

**Located in Roselle, Illinois
Engineered, Tested and Assembled in the USA!**

Sternberg has created a legacy of old world craftsmanship that dates back to the company's inception in 1923. The work ethic and product innovations that made the early Sternberg company successful are still being practiced by our employees today. Our dedicated staff, attention to detail, and quality production processes are what make Sternberg a world class company.

Sternberg serves the municipal, landscape, higher education and commercial markets providing efficient and cost effective lighting solutions to the outdoor market.
