

## IESNA Distribution Types – Light Patterns

Sternberg offers a wide range of high-performance optical designs for its entire line of Luminaires. We can meet your lighting requirements for every Street and Site Lighting project.

	<p><b>IES TYPE II</b> Produces a wide distribution pattern.</p> <ul style="list-style-type: none"> <li>• Sidewalks</li> <li>• On Ramps</li> <li>• Pedestrian Paths</li> <li>• Entrance Roadways</li> <li>• Bike Paths</li> </ul>
	<p><b>IES TYPE IV</b> Produces a forward throw semicircular distribution</p> <ul style="list-style-type: none"> <li>• Sidewalks of buildings/walls</li> <li>• Perimeter of parking areas</li> </ul>
	<p><b>IES TYPE III</b> Produces an asymmetric pattern optimized for most applications.</p> <ul style="list-style-type: none"> <li>• Roadways</li> <li>• Parking areas</li> <li>• Pedestrian areas</li> </ul>
	<p><b>IES TYPE V</b> Produces a circular (or square) distribution pattern that has the same intensity at all angles.</p> <ul style="list-style-type: none"> <li>• Center of roadways</li> <li>• Center Isle of parkway</li> <li>• Parking lot island</li> <li>• Park areas not along pathways</li> </ul>
