

# Fitters

Luminaire fitters are designed as transition pieces between luminaire's globe's or the pole or arm on which it is mounted. Being a utility device does not always mean a plain or unattractive appearance. Sternberg has created an extensive offering of pole top fitters that are beautiful and durable. Made of heavy cast aluminum, Sternberg fitters hold luminaires securely to pole top tenons by multi-point mechanical attachment or can be welded to ensure straight and level luminaire alignment to the pole and for increased durability. Furthermore, Sternberg fitters house most of the electrical drive gear needed to power our advanced LED light engines. They provide a safe and sealed chamber against weather and intrusion of dirt so that internal components last longer and function better during product service life.
